Visalys® Core bonds actively with every adhesive

Kettenbach presents Visalys® Core:

The new generation of core build-up material

Huntington Beach April 20, 2015 – For a lasting bond: Visalys® Core. The new product from Kettenbach LP (www.kettenbachusa.com) represents the next generation of core build-up materials. The most recent addition to the Visalys® family is a dual-curing core build-up material with unique Active-Connect-Technology (ACT) to ensure a reliable bond with all common adhesives – without an additional activator. The product was first unveiled at this year’s International Dental Show (IDS), Cologne, Germany.

Visalys® Core is the first core build-up material from Kettenbach. The fluoride-containing, dual-curing composite was developed for the fabrication of radiopaque core build-ups and core fillings and for cementing root posts.

The product incorporates Active-Connect-Technology (ACT), which is unique in the market. This enables the material to bond actively with all common light-curing and dual-curing, single-step and multi-step adhesives, without an additional activator. The advantage for users is that it allows them to use the bonding agent they are used to – no matter whether it is a light-curing or dual-curing, a single- or multi-bottle system.

Simply a firm foundation – stable and precise

Visalys® Core ensures easy and reliable handling with excellent positional stability. At the same time, it exhibits good flowability and low extrusion force. The excellent compressive strength results in a stable monoblock and a secure bond. Optional light-curing allows the procedure to be continued immediately; reliable self-curing provides for dependable strength even on the cavity floor and in root canals. Excellent polishing characteristics ensure precise preparation; even without light-curing, the smear layer is minimal. The product is also free of Bisphenol A and its derivates.

Visalys® Core is available in dentin and white shades in a 5 ml double syringe and in a 25 ml cartridge. For detailed information about Visalys® Core, visit the Kettenbach website at www.kettenbachusa.com.
About Kettenbach LP

Kettenbach LP (Huntington Beach, CA) is the exclusive U.S. distributor for Kettenbach GmbH & Co. KG (Eschenburg, Germany). Founded by August Kettenbach in 1944, Kettenbach GmbH was created for the development and marketing of medical and dental products. Today, the company is one of the leading international producers of dental impression materials, and is also known in other surgical areas of medicine.
